We believe learners of all kinds should be recognized, supported and empowered to thrive, especially youth with dyslexia and related learning differences that are classified as learning disabilities.

What’s at Stake: The Issue

Mastering early literacy is critical for future education, workforce and social-emotional success.

1 in 5 youth (age 3-20) in the U.S. have learning & attention issues

65% of 4th Graders DO NOT read at grade level

Only 1 in 6 students who are below reading proficiency by the end of 3rd grade ever catch up

Literacy is the #1 predictor of individual success and community prosperity

Early Milestones

High School Impact

It’s a personal journey

“...It was heartbreaking to see our daughter struggle to learn to read. She dreaded reading aloud in class, and worrying what her classmates thought affected her self-esteem. It wasn’t until high school that we found out she has dyslexia. This diagnosis has helped her understand how her brain works, and realize that her difference gives her some advantages. I’m extremely proud of how hard she has worked to overcome these challenges—and not let them get in the way of her success.”

—Dr. Larry Bucshon, U.S. Representative (R-IN)
Early Learning + Early Literacy helps all students thrive, especially the 1 in 5.

Young learners (age 0-9) benefit from a community integration of practices.

“Funding What Works”: The Approach

Addressing the needs of Learning Differences takes a holistic, systems approach. No single program can address all young learners’ needs. Instead, we work with and invest in people, communities and places that are best suited to explore and find what works. This section lends itself to a network theory... and these are the conditions:

- **Parent & Teacher Support**
- **Community Building**
  We also uplift community organizing in a literacy-rich environment.
- **Communities of Practice**
  See examples of communities of practice
“It Takes a Community”: Highlights

**Boston, MA**

Boston Children’s Early Literacy Screener

*BELS* is the only dyslexia screener coming on to the market that addresses all 6 indicators of literacy. This self-administered app will identify struggling readers as young as 4 years old, rather than waiting until after there is a pattern of academic, social or behavioral stresses and challenges.

**Philly, PA**

**AIM Pathways**

AIM Pathways integrates the leading edge of online learning and seeks to solve for ways to affordably scale teacher training, while also providing a gateway to research-driven literacy practices and teacher training. This evidence-based platform will enable teachers to support the 1 in 5 with learning differences by providing and offering best practices for the 4 in 5.

**Vero Beach, FL**

The Learning Alliance is innovating an enriched literacy program model through its *Moonshot Moment Program*. Elements of this are being identified and tested be scaled at a community level and serve as a national model.

[thelearningalliance.org](thelarningalliance.org)

**Philadelphia, PA**

The Read by 4th campaign is leveraging community resources and changing behavior in homes – filling gaps in services in Philadelphia. Programs and initiatives embrace a holistic approach to increasing literacy among children from K to 3rd grade by activating individuals as Reading Captains who embrace the Reading is Everywhere initiative.
